SAMPLE REPORTS OF CAPABILITY ENHANCEMENT AND DEVELOPMENT SCHEMES CONDUCTED DURING LAST FIVE YEARS

Activity Report

Name of Activity **:-**Skill development

Name of Resource Person **:-**Mr. Tejas and Mr. Nayan.

Designation **:-**Trainer

Organization **: -**FACE Pvt. Ltd.

Duration **:-** 01.02.16 to 10.02.16 (8 days)

Target Audience **: -** B.E.

Seminar & Workshop Objective:-

- ➢ Aptitude (arithmetic , logical reasoning)
- ➢ Communication skill
- ➢ Interview technique

Participants:-

- •

Organizer:-

- • Department Of Computer Engineering

Venue:-

- • Seminar Hall

About Programme :

Department Of Computer Engineering is organized training session on Soft Skills and aptitude by Mr.Tejas and Mr. Nayan. During this workshop entire focus is given on basics of English language in written & spoken format. This module is taken from institute internal faculty throughout the session. Following topics covered

- Grammar Skills
- Oral & Written Skills
- Group Discussion Skills
- Interview Skills

This training course basic objective was to brush up the basic skills of students in English language. We have huge response with & positive feedback about this programme.

Interaction by Mr. Tejas and Mr. Nayan

SUMMARY/ACTIVITY REPORT

1. **Course Title**: - PHP 5.0 & CSS3.

2. **Course Code**:- COMP/16-17/01

3. **Course Duration**:- 30 Hours

4. **Resource Person**: - Prof. Milind Hegade, Computer Department, BSIOTR, Wagholi

5. **Date & Place**: - 3rd Sept 2016 to 2nd Oct 2016, Department of Computer Engineering, BSIOTR, Wagholi, Pune.

6. **Background of Course**:-

PHP is an extremely popular, Open Source scripting language, most commonly used on web servers to produce dynamic pages. The name "PHP" is a recursive acronym for "PHP: Hypertext Preprocessor" and was initially created by Rasmus Lerdorf in 1994. As of today, the current version of PHP is version 5, with version 6 in the making. As mentioned, PHP is mostly used on websites, which is what this tutorial will focus on. You may wish to set up your own test server, which is very easy to do, using the next couple of chapters to help you out. If you already have a server up and running or at least access to a server running PHP 5, you can jump to one of the next sections, where we will start writing some PHP. You may go through all the chapters of this tutorial step by step, or you may jump between chapters to learn specific things - it's really up to you. There are introductions to the more common uses of HTML and CSS coding as listed below. Some of the examples are provided just to show problems, others show solutions that work in Firefox, IE, Opera and Safari. Use the example that suits you.

There are always several ways to code and my examples may not suit your page if they conflict with other code in your page, so look at other tutorials in addition to mine. Remember that tutorials can often be out of date as well as offering alternative solutions.

7. Objectives

- PHP is an acronym for "PHP: Hypertext Preprocessor"
- PHP is a widely-used, open source scripting language
- PHP scripts are executed on the server
- PHP is free to download and use

8. Training activities:

- Course timing:-
    - Daily Batch Monday to Friday at 3.30Pm to 6.30Pm.
    - Weekend Batch Saturday & Sunday 10.30 Am to 5.30 Pm.
- Certificate will be issue after successful completion of Course to all participants.

9. Snap Shots of Activity:-

Photo of PHP Lecture by Prof Milind Hegade

Photo of CSS Lecture by Prof Milind Hegade

10. Follow up action plan to contribute further to the projects objectives:-

- Students will further train in related technology in Web Technology and Content Management System domain. Which is design in PHP & CSS

11. **Conclusion**:-

Thus after successful completion of this add-on Courses Student gets expertise in Java Script and web technology domain.

Digital Language Lab

The language laboratory is an audio or audio-visual installation used as an aid in modern language teaching. It is established in the year 2012-13 at Information technology department.

There are different features of language lab, which make the students to have interactive session. It provides equal opportunity to all the students to hear the instructor. Language labs motivate students to talk freely and lose the shyness when talking in front of their friends. Attention on subject is increased resulting in better retention of the concepts. Furthermore, it develops the listening and communication skills.

Biyani Technologies supported to establish this language lab.

The Need for a Language Laboratory

It is required of any learner to have a good command of the language for communication purposes, with clarity and accuracy being vital for effective and efficient communication. What helps one to acquire such proficiency in a language is the process and the method of learning that language.

Infrastructure

It contains Innovative products such as PC's with high configurations, digital multimedia control, headsets and microphones, the interactive response pad, etc. These are very useful for students learning languages for communication. These interactive tools are designed to enhance not only language teaching but also class room grading and distance learning.
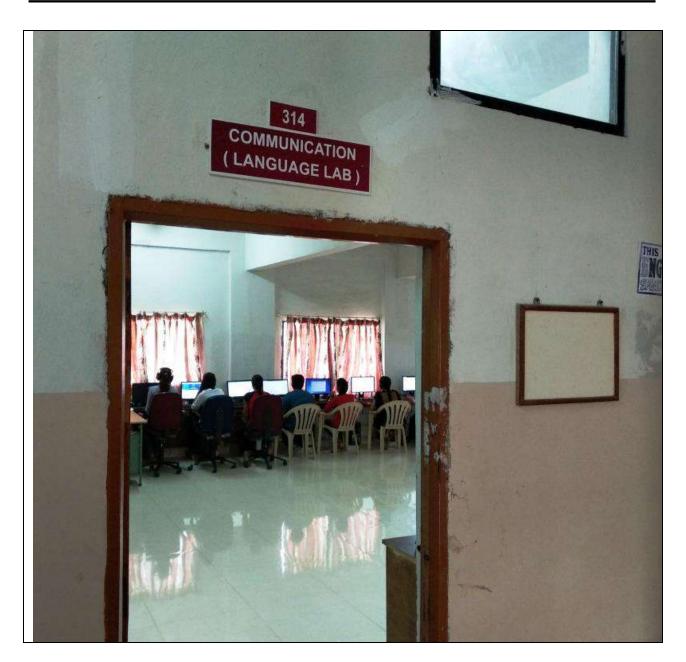

BSIOTR Digital Language lab in general offers following facilities:

- Two way and Interactive communication between teacher and individual student. As well as entire classroom at a same time
- Learners can record their own voice and play back the recordings, interact with each other and the teacher, and store results.
- Teachers can intervene and control the learners' computers via the teacher's console, track of learners' work etc.
- Use complimentary provided study material for assignments, self learning etc.
- Content Development and Lesson composer: Teachers can develop text, audio and video contents as well as import material in digital format available with them in the software.
- Self-access for independent learning which includes access to resources outside class
- Group Discussion
- Text to Speech / Pronunciation
- Dictionary
- Broadcasting any message to entire classroom
- Student monitoring and controlling through screen capturing

The language laboratory is very useful for assessing students' speech. It provides students with the technical tools to get the best samples of pronunciation of the language. The electronic devices used in the laboratory will stimulate the eyes and ears of the learner to acquire the language quickly and easily. The laboratory's collection is designed to assist learners in the acquisition and maintenance of aural comprehension, oral and written proficiency, and cultural awareness.

The language laboratory offers broadcasting, web-assisted materials and videotaped off-air recordings in the target language. In short, a learner can get the experience of having interaction with native speakers through the laboratory. Hence, the language laboratory has become the need of the hour in any language learning process for communication.
