

4.2 Library as a learning Resource

4.2.1. Library is automated using Integrated Library Management System (ILMS)

The Central Library of the institute is partially automated with Autolib Software , version 10, from 2010. This system enables efficient library administration to cater students and staff services.

This software has various following modules as under:

Circulation: Circulation module provision is used to issue/return/renew books, non-print material circulation (CD, DVD, etc.) and Print Journals/Magazines).

Library rules setting: Generate the barcodes, listing of books (by authors, publishers, and suppliers) Printing of member barcode, etc. with transactions through the email and message alert facility.

OPAC: Online Public Access Catalogue for searching the library resources. User can search the library resources as follows:

General Search: Title Author Publication Keywords Classification.

Advance Search: The searching can be done with various combinations Title Author Publication

Keywords Classification.

Accession Search: Search can also be done through the accession numbers without remembering the title or author of the book. This facilitates fast & accurate searching.

Reports: This is an important component of the Integrated Library Management System (ILMS) which helps to generate various report namely. Books Issue/Return date wise, user wise.

Software Details are as given Below:
