A Report on the Industrial Visit

To

**" India Meteorological Department ,  
Shivaji Nagar, Pune."**

**Submitted By-**

**Name: Yogeshwari Hanumant Dubale**

**Roll No:3279  
(TE IT Sem II)**

**18th May 2022, Time: 10.30 AM**

### 1. Visit Summary:

This report provides a brief summary of the Industrial Visit organized by Training & Placement Cell, IT Department. The visit to "India Meteorological Department" Shivajinagar, Pune on 18<sup>th</sup> May 2022 from 10:30 A.M to 2.00 P.M in the IMD Center, Pune. The visit brought together over 60 students of IT Department and Faculties.

The main objective behind the visit was to make student aware about principal agency responsible for meteorological observations, weather forecasting and seismology.

### 2. About Company:

Human resource development has always been one of the prime thrust areas of the India Meteorological Department for capacity building and to keep pace with latest trends in various activities of the Department. The Meteorological Training Institute (formerly CTI) of the India Meteorological Department (IMD) is a World Meteorological Organization (WMO) rated Regional Training Centre (RTC), headed by Deputy Director General of Meteorology (Training), and is situated at a pleasant location at Shivajinagar in Pune.

Prior to the shifting to Poona India Meteorological Department had its Headquarters at Simla. The transfer of Headquarters from Simla to Pune was approved by the Govt. in early 1926. The first section transferred to Pune started functioning by the end of March, 1928 and the All India Weather Report started being published from Pune from 1<sup>st</sup> April, 1928. The building was completed in June 1928, and the opening ceremony of the new H.Q. building of the India Meteorological Department was performed by then Governor-of Bombay, Sir Leslie Orme Wilson, on 20<sup>th</sup> July, 1928, in the presence of the Hon'ble Sir Cecil McWatters, then acting Member of the Governor General's Executive council, who reviewed the work of the Department from its commencement. The shifting of staff from Simla to Poona was also completed by the middle of 1928. Pune (now Pune) continued to be the headquarters of the Organization till the outbreak of second World War in September, 1939. As the IMD Headquarters was shifted from Simla to Pune, the Pune Met office is popularly known as "SIMLA OFFICE".

IMD is the national meteorological and hydrological service of the country and the principal government agency in all matters relating to Meteorology, Seismology and allied subjects. Facilities for meteorological training at Pune and New Delhi have been recognized by the WMO to function as RMTC in all the four main disciplines namely, General Meteorology, Radio-meteorology, Telecommunication and Agro-meteorology.

### 3. About the Session:

#### 1. Surface Instrument laboratory :

The **Surface Instrument Division** was conceived and established at Pune after India became an independent country. Conventional Surface Meteorological instruments, upper air Ozonesonde and Radiometersonde instruments are manufactured at the Instruments Division. These instruments are manufactured at a well equipped and self sufficient workshop which is ISO 9001-2008 certified maintained by the division. All manufactured instruments are tested and calibrated in an inhouse calibration laboratory. The laboratory also carry out research and development in instrumentation and bring out new designs. The Division maintains detailed instruction manuals and engineering drawings on all

instruments. The division established and maintains a large network of Automatic Weather Stations (AWS), Radiation Observatories, Airport Meteorological Instruments etc. These activities have contributed towards IMD, Pune being designated as the Regional Training Center for instruments by the World Meteorological Organization. The Division is headed by the Deputy Director General of Meteorology (Surface Instruments).

The Workshop of Surface Instrument Division, Pune was established way back in 1920 with the objective of inspection and maintenance of surface meteorological instruments installed at IMD observatories. Since 1947 IMD, Pune Workshop was fully equipped with several shop floors, ranging from foundry to packing units for manufacturing of all types of surface meteorological instruments. In 2010 the workshop unit was awarded with ISO 9001:2008 certifications for Manufacture, Testing, Calibration and Supply of Meteorological Instruments. Recertification audit of ISO 9001:2008 was conducted on 25th July 2014 and is now valid till 2017.

**The Surface Instrument Division has the mandate :**

- To manufacture, calibrate, supply and maintain surface meteorological instruments at observatories of IMD.
- To supply and maintain Airport Meteorological Instruments for civil airports.
- To supply instruments to defence organisations.
- To maintain the network of Automatic Weather stations (AWS) and Automatic Rain gauge stations (ARG) for near real time weather forecasting services of IMD.
- To impart trainings to operational staff of IMD for maintenance and upkeep of instruments.

## **2. Seismology Unit:**

Seismology (NCS) is the nodal agency of the Government of India for monitoring earthquake activity in the country. NCS maintains the National Seismological Network of more than 150 stations each having state of art equipment and spreading all across the country. NCS monitors earthquake activity all across the country through its 24x7 around-the-clock monitoring center. NCS also monitors earthquake swarm and aftershock by deploying a temporary observatory close to the affected region.

Apart from earthquake monitoring, NCS is also actively involved in Seismic Hazard Microzonation and seismological research. The major activities currently being pursued by the NCS are:

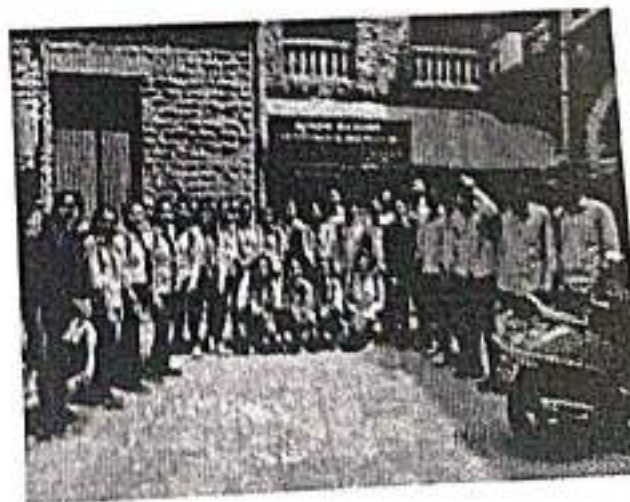

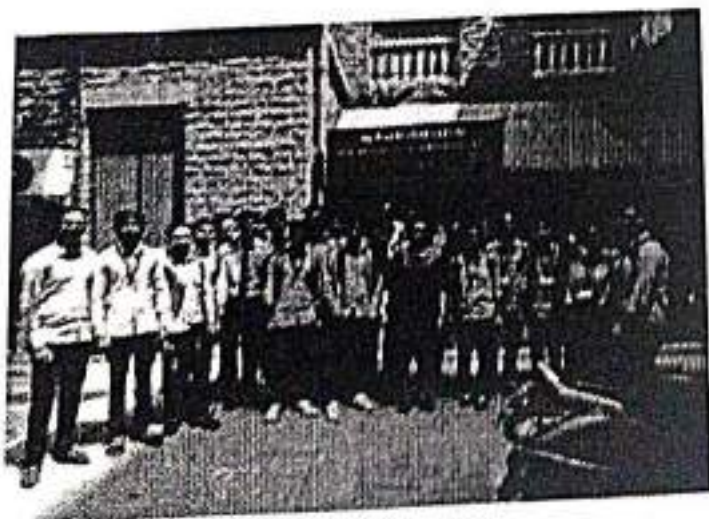

1. Earthquake monitoring on a 24X7 basis.
2. Operation and maintenance of national seismological network comprising of more than 150 Stations.

### 3. CAGMO(Observatory):

India Meteorological Department (IMD) has specially designed Digital Automatic Recording System (DARS) for continuous measurement of meteorological parameters in numerical format and graphical format. This system stores data and also view data of Temperature, Relative Humidity, Station level Pressure, Wind Speed and Wind direction and rainfall in numerical format and also graphical format. The data may be stored up to five years and may be downloaded as per user requirement. The main purpose for development of this system is a step towards automation of Conventional Observatory. This system will replace the conventional autographic charts such as Thermograph, Barograph and Hygrograph. This new indigenous developed system does not require daily maintenance as compared with conventional, mechanical autographic charts. Thermograph, Barographs and Hygrographs uses mechanical means for its measurement. The main disadvantage of autographic charts, it requires daily 2 maintenance such as changing daily charts at 0300 UTC, properly ink filling and also requires maintenance of clock drum. A tabulation sheet from daily charts has to be prepared. IMD has installed DARS at CAGMO, Pune, Meteorological Centre, Trivandrum and Regional Meteorological Centre, Nagpur. The data of DARS with autographic charts recorder at conventional observatory have been compared and found satisfactory. The performances of DARS in IMD observatory are very encouraging since their installation. IMD is planning to install DARS at Antarctica and also to IMD's 199 conventional observatory
