Message From Sourav to Students

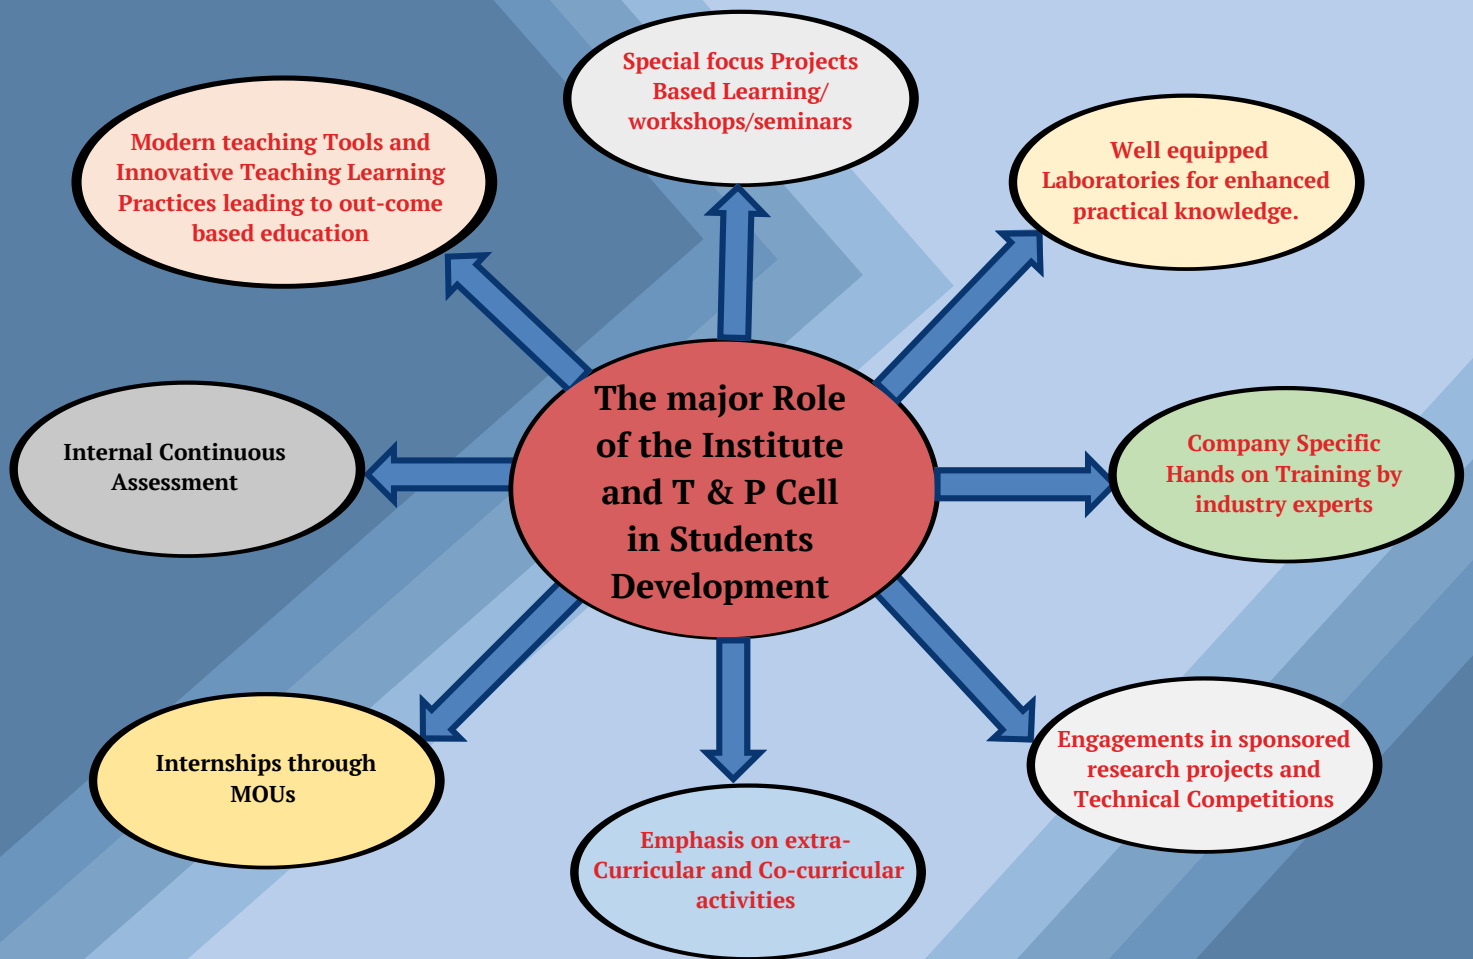

The journey till here was not a straight line it had many ups and down in it. But the key thing to achieve goal is to be consistent and keep the hard work grinding one day everything will be worth. My suggestion for everyone will be first stick to the basic knowledge and have CS fundamentals clear and have a strong hold on data structure and algorithms. You should not get disappointed by failure in the interviews. You should learn through the failures and work hard to make the further interviews successful.

I am thankful to my parents, teachers, training, and placement cell, and all my friends for their consistent support and guidance in this journey.
