Aarogya Setu

On 2nd April 2020, India launched Aarogya Setu mobile App for helping augment the efforts of limiting the spread of COVID19, with an objective of enabling Bluetooth based contact tracing, mapping of likely hotspots and dissemination of relevant information about COVID19. The App has over 114 million users as on 26th May, which is more than any other Contact Tracing App in the world. The App is available in 12 languages and on android, iOS and KaiOS platforms. Citizens across the country are using Aarogya Setu to protect themselves, their loved ones and the nation. Many youngsters also call Setu as their Bodyguard. The key pillars of Aarogya Setu have been transparency, privacy and security and in line with India's policy on Open Source Software, the source code of Aarogya Setu has now been made open source. The source code for the Android version of the application is available for review and collaboration at https://github.com/nic-delhi/AarogyaSetu_Android.git. The iOS version of the application will be released as open source within the next two weeks and the server code will be released subsequently. Almost 98% of Aarogya Setu Users are on Android platform.

The Government of India, by opening the product design and code, has also demonstrated its strong commitment to contributing to the global good. India is keen to share learnings from our approach to technology to fight COVID-19 and make the benefits of the solution available to the rest of the world and any government can use it for fighting the pandemic. Together we can, and we continue supporting the doctors and frontline health work in helping fight this pandemic.

Integrated Govt. Online training portal for COVID 19

India is fighting against covid-19 Pandemic and India's first line of workers is already engaged in COVID relief and doing commendable job. However, a larger force will be needed to replace the first line and to tackle the exponential or geometric increase in positive COVID cases in the subsequent stages of the pandemic.

Accordingly, to take care of the training needs of the frontline workers, the Government of India has launched a training module for management of COVID-19 named 'Integrated Govt. Online training' (iGOT) portal on Ministry of HRD's DIKSHA platform for the capacity building of frontline workers to handle the pandemic efficiently.

Courses on iGOT have been launched for Doctors, Nurses, Paramedics, Hygiene Workers, Technicians, Auxiliary Nursing Midwives (ANMs), State Government Officers, Civil Defence Officers, Various Police Organisations, National Cadet Corps (NCC), Nehru Yuva Kendra Sangathan (NYKS), **National Service Scheme**, Indian Red Cross Society, Bharat Scouts and Guides and other volunteers.

The training contents of the course include Basics of COVID, clinical management, ICU care management, infection prevention and care, usage of PPE, quarantine and isolation, training for NCC cadets, management of COVID 19 cases, laboratory sample collection and testing, psychological care of patients, paediatric care in COVID, pregnancy during COVID, etc. The new learning content is being regularly added to the modules.

The platform provides the training module on flexitime and on site basis so that the COVID response can be delivered at scale for the workforce needed to tackle the pandemic.

Our NSS volunteers also take part in it. So many volunteers register Online training' (iGOT) portal on Ministry of HRD's DIKSHA platform for the capacity building of frontline workers to handle the pandemic efficiently.

Essay on
COVID 19

The global impact of covid 19, the disease caused by the novel coronavirus, means colleges and positive students alike are in for an admissions cycle like no other. Both face unprecedented challenges and questions as they grapple with their respective futures amid the ongoing fallout of the pandemic.

Definitely COVID 19 is dangerous virus. If you have cough, fever and difficulty breathing seek medical care early or call your health facility center by telephone first.

The coronavirus disease (COVID 19) caused by a virus, not by bacteria. The virus that causes COVID-19 is in a family of viruses called coronaviridae. Antibiotics do not work against viruses. Some people who become ill with COVID can also develop a bacterial infection in this case.

COVID-19

Coronaviruses are a large family of viruses cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome and severe acute respiratory syndrome. A novel coronavirus is a new strain that has not been previously identified in humans.

Due to spread of corona virus everyone had to face many difficulties. On the other hand corona has taught us important lessons.

Coronaviruses are zoonotic, meaning they are transmitted between animals and people. Detailed investigations found that SARS-CoV was transmitted from civet cats to humans and MERS-CoV from dromedary camels to humans. Several known coronaviruses are circulating in animals that have not yet infected humans.

Common signs of infection include respiratory symptoms fever, cough, shortness of breath and breathing difficulties. In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and even death.

Standard recommendations to prevent infection spread include regular hand washing, covering mouth and nose when coughing and sneezing, thoroughly cooking meat and eggs. Avoid close contact with anyone showing symptoms of respiratory illness such as coughing and sneezing.

Essay on
"NSS - Not me But you"

National service scheme means NSS is beneficial to both students as well as society in various different means. NSS helps the student to grow individually and also as a group. It makes the student confident, develop leadership skills, and gain knowledge about other people from different walks of life. The motto of NSS "Not me But You", reflects the essence of democratic living and upholds the need of selfless service.

NSS was formally launched on 24th Sep 1969, the birth centenary year of father of Nation. This 24th Sep is celebrated every year as NSS Day.

The objectives of NSS are

- i) Understand the community in which the student work
- ii) Understand themselves in relation to their community.
- iii) Develop among themselves a sense of social and civic responsibility
- iv) Identify needs and problems of community and involve them in sort of problems
- v) Utilize their knowledge in finding practical solution to individual and community problems.

REDMI NOTE 9
48MP QUAD CAMERA

One advantage of the traditional classes over online classes is that students who are not disciplined enough may not be able to self through successfully. Because there is nobody to push them around with traditional classes however, there are rules to put them in check. As such, students attending traditional classes are more likely to be committed to their education.

Another advantage of the traditional classes is all the doubts that students might be having regarding a given course content can be cleared by the instructor on the spot, unlike online learning whereby such explanations might not be as coherent as the student would have wished.

Online learning is convenient and has less basic requirements compared with traditional learning. It also allows learners who would have ordinarily not gone back to school to access an education. However, online students don't benefit from a close interaction with their peers and instructors as do their regular counterparts. Also, regular students can engage their instructors more easily and readily foster in case they want to have certain sections of the course explained, unlike online students.

NATIONAL SERVICE SCHEME [NSS A-98]

Name - Pranjal Satish Sumbhe
Class - TE (Comp) Div-A
Topic Name - Lockdown

The whole world has come to a standstill, and the reason is the pandemic COVID-19. All of a sudden, it seems we are a part of horror movie. The villainous Coronavirus is killing thousands of peoples, and we are feeling helpless. It has turned our lives upside down. Even in our dreams, we could not have imagined ever ourselves confined to our homes, with no outings and unable to meet our friends & relatives.

Reasonably, the situation has given us a chance to look at things differently. In the beginning, this lockdown was considered as holidays by some children, like me. Once extended, it has made us realize the value of attending college. We appreciate the hard work of our teachers who are trying their best to teach us through online classes and providing us with study material. Teachers are not leaving any stone unturned so that we do not waste our precious time sitting idle. Although initially taking online classes was a challenge for them, they have quickly adapted so that our academic pursuits not get affected. This has taught us

"Never to run away from challenges when life throws them upon us."

lockdown is giving us many lessons about life. We have learnt to handle difficulties with a positive mind, and I hope these lessons remain with us throughout life.

"There is an end to every nightmare, if this one shall end too!"

and try to adapt according to the situation."

These hard times are teaching us the value of everyday food items, like fruits, vegetables, and groceries in our lives. They have become so valuable that nowadays they are not readily available. We are learning to manage ourselves with limited resources. We have learned to respect our farmers, and the vendors who are bringing these essentials to our doorsteps. We have realized that we should never waste food because many people are unable to have a single meal during this lockdown period. It has also taught us life beyond junk food as now we know that delicious food can be cooked at home too. We are more alert about personal hygiene & cleanliness.

The lockdown has also made us appreciate our parents, who usually work day and night to fulfill our reasonable demands and never complain. Spending more time with them gives us opportunity to understand them and to learn what quality time is. Life is not about only studies, TV, and games. It is about sharing of

Online learning vs. offline learning

Being in a traditional classroom provides students with an opportunity to experience freedom and interact with world. Putting a student in a room with a computer means that the student will never be able to bond with the professor and other students.

When studying online, it becomes difficult for students to clear their doubts. It is hard for a student to clarify something that he/she does not understand. This is because the student cannot consult an expert on that subject for further clarification. Students do not have the same ability to understand concepts. In a traditional classroom setting, the student is in direct contact with the professors, library, laboratory, and peer students. In a traditional classroom, the student is able to ask questions and get different interpretations of the problem. Moreover, he/she can gain an experience of using multiple methods of answering at the solution. These methods provide adequate resources for students to clear doubts. This is not possible in an online learning program.

Adult students are better suited to take up online classes than younger students. This is because adult students already have a lot

PROF. DR.T.J.SAWANT
FOUNDER SECRETARY

DR.T. K. NAGARAJ
PRINCIPAL

NATIONAL SERVICE SCHEME [NSS A-98]

life experience in a working environment. They are usually an already working and have families that depend on them. These people are able to portray a high level of responsibility while taking up their classes. Often, people who study online have working experience in the area they are trying to acquire a degree, therefore, it becomes logical for these students to enroll in online degree programs. It is not necessary for these persons to adjust their working schedules, leave the family, and spend a lot of time travelling just to attend a traditional class.

Young high school students cannot gain the same benefits from online classes as experienced adult learners can. At their age, they require more attention because they have no working experience. They need a teacher to be there in person to help them understand and practice basic concepts.

Online classes are only necessary for people who are working and at the same time want to acquire a degree, or for people who have families and have to be at home to take care of children. Online education is for experienced people and not for starters.

social activities and provides a good environment for interaction. Online classes are only beneficial for people who are trying to work and study at the same time. Online learning is most suitable for people who have families and have to be at home to take care of children. Online learning cannot be as effective as traditional classroom learning.

It is possible to learn through online classes however, what one learns through online classes is not what one will need in life. Young students who enroll in online classes do not exploit their potential to the fullest. This is because these students are going through a social and brain development phase that requires interaction with their students as well as the dialogue with the tutor. Missing this opportunity may have lifelong implications for the student.

Online classes may be perceived as not having any distractions and can be taken up at the comfort of the learner. However, it is important to note that distractions are everywhere, even at home. Distraction in a classroom is often beneficial.

Speech on organ donation

Good morning, to our honourable guest and respected parents and my friends.

I am Balaji Kamble and I have been given the opportunity to deliver a speech on organ donation.

Organ donation is a social act that is looked upon with honour. India follows the opt-in system for organ donation. The Transplantation of Human Organs Act 1994 controls the organ donation in India. India's Ministry of Health and Family Welfare & Government website gives out legal forms for those wishing to donate an organ.

Organs are the vital tissues that make our entire body function, and when a particular organ fails, it requires immediate treatment to replace it with a new and healthy organ of the donor. Common organ transplantations include heart, liver, kidney, some marrow, pancreas, lungs, and eye.

Some organs like a kidney, a part of the pancreas or the liver, a part of the intestine can be donated to the ones in need by a living donor. But most of the organ donation takes place after the death of the donor.

Organ donation is a kind and helpful act by the donor. It can help to improve the quality of life for many individuals. An eye transplant could help a blind person see, the heartful could again, people can avoid costly routine treatments and opt for transplantations of organs by the donor.

The organs that are donated serve as tools for scientific researches and experiments. A medical student also gets to learn medical science by the aid of donated organs. Biotechnology gains a lot of service from donated organs. Thousands of patients wait for transplantation, and some donors come into their lives as a ray of hope.

Organ donation is a noble deed, but its power is still undervalued. The generous act of organ donation has gradually increased in the last twenty years and has shown excellent results in children and especially in the aged. Improvements of the results have been witnessed due to innovations and up-gradation of peri-operative management.

An organ transplant depends on the availability of human organs. Organs donated by a single person can save up to eight lives. Organ donation can be divided into three categories, which are directed donation, in which the donor gets to choose the person

receiving the organ. The second is the non-directed donation, where the donor is not in the know of the person in need of organ transplantation. The third type of organ donation is the paired donation, where only the kidney is donated to the person in need.

Saving an individual's life by donating a vital organ is not only a courageous act but a respectable one as well. There is no age bar set to become a donor. Young, adults, elderly, all can participate in this charitable process.

Every person is eligible to become an organ donor. There are people in desperate need of organs hoping for survival. People should be made aware of organ donation so that more lives can be saved.

Thank you.
