### Accessing 8051 Memory Areas

- Internal RAM (00-7F) directly and indirectly accessible
- External RAM (00-FF) via bus, indirectly and through address latch

### Port Structure

The 8051 contains four I/O ports

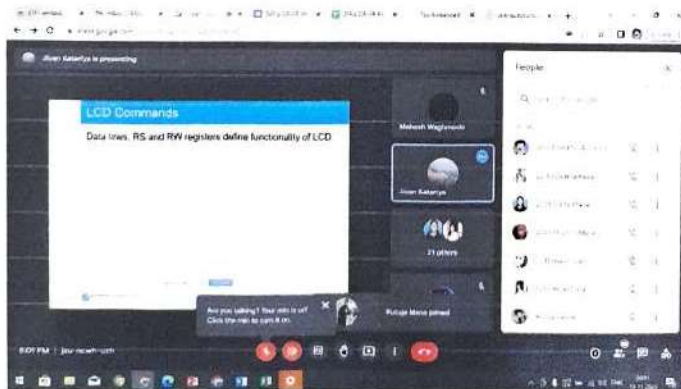

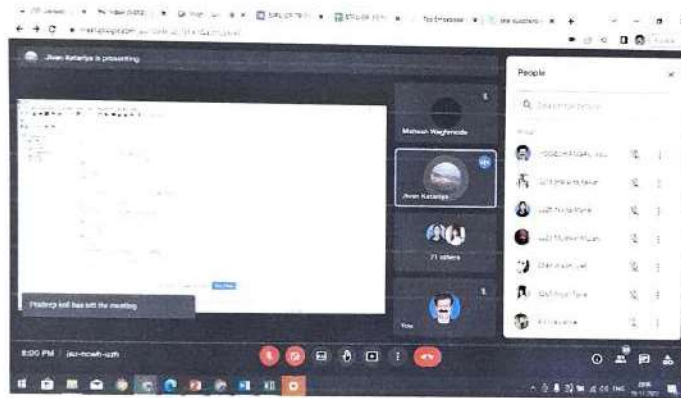

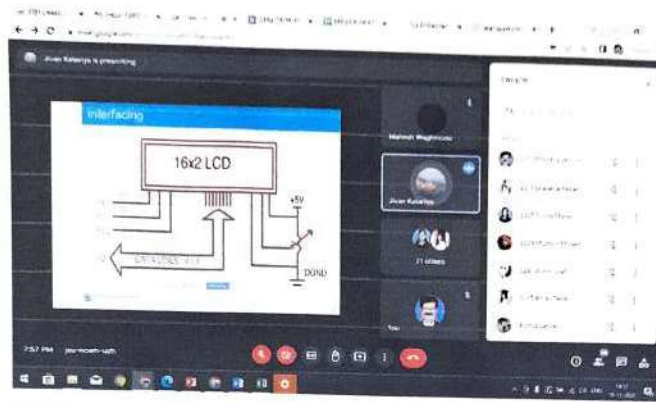

All four ports are bidirectional

Each port has SFR (Special Function Registers, P0 through P3) which works like a latch, an output driver and an input buffer

Both output driver and input buffer of Port 0 and output driver of Port 2 are used for accessing external memory
